Semi- Automatic Hemming Device 半自动下摆辅助装置

特点

FEATURES

1 Fast, stable and easy to use:

- No specific hand movements and techniques required, It is easy to finish the hemming sewing operation, as long as the cloth is supported to the forward direction. Operating speed up to 5000rpm. Make it easy for beginners, and let skilled workers increase production capacity.

2 Multiple adjustment functions to adapt to various cloth specifications:

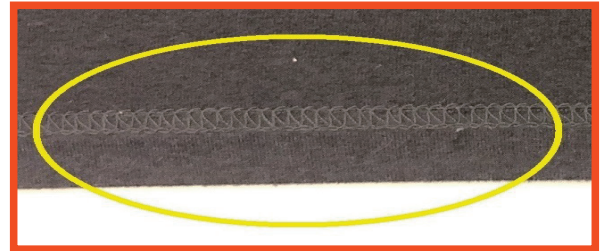

- The adaptive adjustment mechanism is specially designed for the elastic functional cloth of ultra-thin and super slippery hands, so that the types and specifications of cloth can be applied more widely.

3 Nearly automatic operation with Advance Interlock Assisted Function Extension Controller:

- Cooperate with foot switch and start learning mode to automatically set control parameters.
- Effectively control the timing of air pressure output and save 2/3 of compressed gas consumption.
- Automatic control of air supply, sewing completion and needle stopping, and continuous operation close to full-automatic process.

1 快速、稳定、易上手：

- 不需特定手式与技巧，双手只要扶持好布料朝前进方向即可轻易完成下摆缝制操作。一个动作到底不需停顿，线迹与折缝边缘宽度一致且完美。操作转速高达5000rpm。让新手轻易就能上手，让老手提升产能。

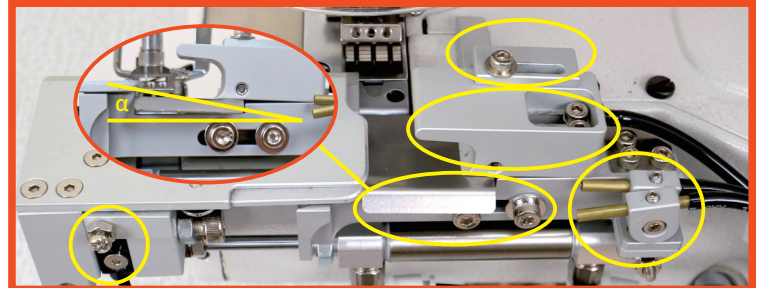

2 多处调节功能适应各种布料规格：

- 特别针对超薄、超滑手的弹性机能布所设计的适应性调整机构，使可应用布料种类及规格更广泛。

adjustment to adapt 可调整布料適應性

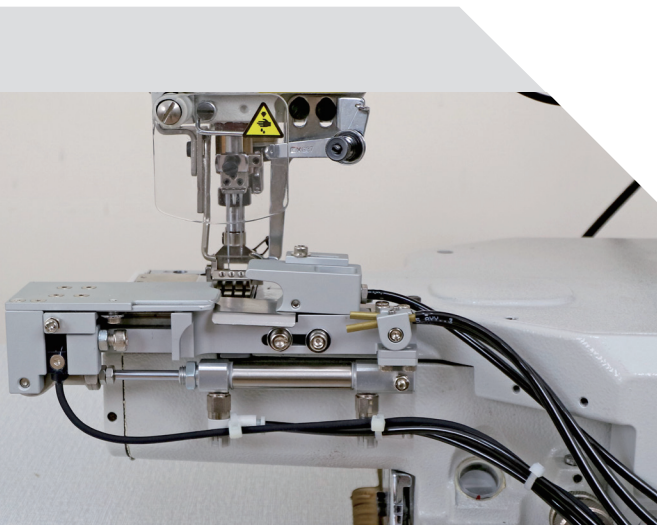

3 搭配进阶缝缝辅助功能延伸控制器实现接近全自动操作：

- 配合脚部开关及开启学习模式自动设定控制参数。
- 有效控制气压输出时机，节省压缩气体使用量达 2/3。
- 自动控制送气、完缝、停针操作，可连续操作接近全自动流程。
